The majority of the Company's revenue came from the distribution of lighting equipment. Notably, the government project sector experienced significant growth, with an increase of over 3,000%, representing 49 percent of the total revenue, equivalent to Baht 317 million. Revenue from the real estate project sector, however, decreased by 26 percent, reflecting the slowdown in the real estate development business in 2024. Customers in this sector began reducing their purchases from the end of the second quarter of 2024. Revenue from this sector amounted to Baht 167 million. In terms of operating costs, the Company's operating

expenses in 2024 increased by 59 percent compared to 2023. Nevertheless, the gross profit improved in line with revenue growth, totaling Baht 110 million, representing an 11 percent increase compared to 2023.

The total assets as of the end of 2024 amounted to Baht 488 million, representing a 2.6 percent decrease from the total assets at the end of 2023. The decrease was mainly due to the Company's normal business operations, including the purchase and sale of its core products.

For liabilities, the Company's total liabilities as of the end of 2024 decreased by 26.5 percent compared to the end of 2023. This was primarily due to a net decrease of Baht 49 million in trade payables and other current payables resulting from payments made to suppliers. During 2024, the Company also received a long-term loan from a financial institution in the amount of Baht 10 million.

The shareholders' equity as of the end of 2024 increased by 8.1 percent compared to 2023, mainly due to the Company's net profit of Baht 28 million for the year 2024.

Mr. Nara Sriphet proxy Inquired about the following information:

Question 1: What are the reasons for the Company's profit not growing in line with its revenue, and what corrective measures has the Company implemented?

Mr.Thanaseth Akkrabunyapath answer: The Company's revenue growth primarily came from new government sector projects, which represent a new customer group. However, the profit margin from this group is relatively lower compared to the revenue generated from real estate development projects, which have historically been the Company's main source of higher-margin revenue. Nevertheless, the Company's net profit still recorded a significant year-on-year growth compared to the previous year. Currently, the proportion of revenue derived from real estate development projects the Company's traditional core business has decreased compared to previous years. However, if the real estate sector recovers within the next 1–2 years, it is expected that the Company's overall operating results will experience a significant improvement.

Question 2: Has the Company encountered any cash flow issues arising from government sector projects, considering that the Company may need to allocate funds to support various operational activities?

Mr.Thanaseth Akkrabunyapath answer: As for cash flow, the Company has not experienced any adverse impacts.

This is because government sector projects have a delivery timeframe of no more than 180 days, whereas under normal operations, the Company typically completes project deliveries within 90 days. The Company also receives full payment from government sector upon project completion. Moreover, government projects are backed by pre-allocated budgets, thus the Company has not encountered any issues related to payment collection.
